---

Full Stack Developer with one year of experience in building scalable web applications. I specialize in creating attractive and functional user interfaces, applying solid design principles and development methodologies such as TDD. Currently, I am in my second year of a Technical Degree in Computer Science, complementing my education with practical experience on real-world projects.

---

## Experiencia

- **Internship – ForIT (Software Factory) [06/25] – Present:**  
Admission granted based on performance in the Full Stack course at FORMAR, through a selection process focused on candidates with professional growth potential. Currently participating in the company's training program, emphasizing best practices, software architecture, and modern JavaScript stack tools.  
Completion of the program (expected by [07/25]) will enable assignment to real projects within the team.  
Part-time schedule.
  - **Pokedéx API - Academic Project (Universidad Nacional de General Sarmiento) [04/25] - [06/25]:**  
<https://github.com/Alexrulu/ip-1c2025-AlexandroLucero>  
Final project for the course "Introduction to Programming." The task involved completing and debugging a Django web application that uses the Pokedex API, implementing missing features to correctly display item cards.  
Thanks to my previous experience and academic background, I adapted quickly to the Django environment, learning the technology independently and resolving issues in an incomplete and error-prone codebase.  
Final grade: 10.  
Technologies used: Python, Django, HTML, CSS, Git.
  - **KeyToDream - Final Full Stack Project (Digital House + FORMAR) [09/24] - [05/25]:**  
<https://keytodream.vercel.app>  
Development of an interactive platform focused on dream tourism, integrating 3D animations and a secure login system. Participated in all project stages: design, frontend and backend development, and deployment.  
The project was selected to be presented at the course closing ceremony as one of the most outstanding developments.  
Technologies used: React, Node.js, Express, MySQL, Tailwind CSS, Three.js, Motion, JWT, Git, Vercel, Render, Clever Cloud.
- 

## Education and Certification

- Technical Degree in Computer Science – Universidad Nacional de General Sarmiento [03/24] – Present
- Full Stack Web Development Certificate – Digital House + FORMAR [07/24] – [05/25]

---

## Languages

- Spanish: Native
- English: C1 level (EF SET 61), official certificate: [cert.efset.org/en/xwizHG](https://cert.efset.org/en/xwizHG)

---

## Tech Stack

- Frontend: React, Astro, Tailwind CSS, HTML, CSS, Motion, Three.js.
- Backend: Node.js, Express, TypeScript, Supabase, Django, Python.
- Databases: MySQL, PostgreSQL (via Supabase).
- Tools: Git, GitHub, Vercel, Render, Clever Cloud, Jira, Miro.

---

## Soft Skills

- **Problem Solving:** Ability to work under pressure while maintaining efficiency in demanding environments.
- **Adaptability:** Quick learner of new technologies and environments; experienced in integrating tools and languages within tight deadlines.
- **Teamwork:** Active listening, empathy, and effective communication to achieve collaborative goals.
- **Discipline and Commitment:** Previous experience as a fitness instructor, demonstrating strong results orientation and consistency in execution.
- **Autonomy:** Proactive and goal-oriented approach; capable of researching, learning, and executing tasks independently.
- **Structured Thinking:** Application of best practices in programming, design, and software architecture.
- **Time Management:** Consistent delivery and efficient organization of projects.
- **Responsibility:** High rigor in development; nothing is left to chance. Everything is executed efficiently and with focus from the start.
